

SOHAIB LAARICHI

Fullstack Software & DevOps Engineer

Marrakesh — (+212) 6 01 82 01 01 — sohaiblaarichi112@gmail.com

My Portfolio

Profile

Fifth-year Engineering student (MIAGE) with dual expertise in software development and DevOps engineering. Specialized in the Java/Spring Boot stack and cloud-native microservices architectures. Experienced in designing critical applications, particularly in the HealthTech sector (FHIR standards), with a strong focus on performance and continuous integration.

Professional Experience

Fullstack Software Engineer (End-of-Studies Internship)

February 2026 – Present

FireThunder

- Design and development of the FireLIS/OpenELIS Laboratory Information System (LIS) to address healthcare modernization challenges.
- Conducted reverse engineering processes and comprehensive API cataloging according to FHIR interoperability standards.
- Implemented new fullstack features and optimized the existing software architecture.

React/Node.js Fullstack Developer (Internship)

July 2025 – August 2025

HA Groupe, Marrakesh

- End-to-end development of the *Mkhademia* platform, targeting the Moroccan freelance market.
- Created a robust and scalable architecture using Node.js, Next.js, and MongoDB to ensure a seamless user experience.

IT & Network Technician (Internship)

May 2023 – June 2023

Phone Dreams, Marrakesh

- Deployed and configured local server infrastructures, managed hardware, and resolved network issues.

Technical Skills

- **Backend Development:** Java, Spring Boot, Node.js, Express.js, JEE.
- **Frontend & Mobile Development:** React, Next.js, Flutter/Dart, JavaScript, HTML/CSS.
- **DevOps & Cloud:** Docker, Kubernetes, Microsoft Azure (Certified), CI/CD, Git.
- **Databases & Modeling:** MySQL, MongoDB, Oracle, PostgreSQL, UML.
- **Systems & Networks:** Linux Administration, Windows Server, Virtualization.

Key Projects

- **FireLIS / OpenELIS (HealthTech):** Analysis, reverse engineering, and API cataloging according to health interoperability standards (FHIR) for an open-source Laboratory Information System.
- **PharmaLive:** Developed a comprehensive pharmacy management information system (Java, MySQL) integrating inventory control and user role management.
- **Enterprise Network Architecture:** Virtual deployment of an infrastructure for 100 users with Active Directory, DHCP, and DNS on Windows Server.

Education

Engineering Degree in Computer Science - MIAGE Specialization

2024 – Present

Moroccan School of Engineering Sciences (EMSI), Marrakesh

Bachelor's Degree in Computer Science & Higher Technician Certificate in Systems and Networks

2021 – 2024

Private University of Marrakesh (UPM) / Mohamed V High School

Involvement & Tech Ecosystem

- **GITEX AFRICA:** Attended the technology summit in Marrakesh (May 2024), gaining immersion into the continental tech ecosystem.
- **Social Action:** Active volunteer during relief operations for the victims of the Al Haouz earthquake (September 2023).
